

Youth Education Project Phase I Application

RAC – Radio Amateurs of Canada – the united voice of the Canadian Amateur Radio Service, has initiated a dynamic new program, intended to offer teachers a new tool to reach their students in the areas of communications, geography, science and technology. The RAC Youth Education Program will offer participating schools assistance, both financial and technical, to acquire necessary communications equipment and integrating it into existing programs in the school.

Understanding that relevance is often difficult to simulate in the classroom, RAC is offering a unique opportunity for students and teachers to talk to a peer on the other side of the world, or an astronaut orbiting the earth through the medium of Amateur Radio.

Phase I of the program is intended for schools, across Canada, which already have an element of radio as a part of their curricular or extra-curricular program.

A qualified school will:

- be using Amateur Radio as an enrichment program, a part of a unit of curriculum or as a club activity at the school.
- have the full support of their educational administration.
- have a licensed Amateur Radio operator on staff or willing to work closely with the school
- have the committed support of a local Amateur Radio club.
- use a hands-on approach for radio related projects as a part of the curriculum.
- be willing to fully participate in the promotion of the project

Applications should be submitted to and further information may be received from:

Bj. Madsen – VE5FX – Chairman

RAC Youth Education Program

Box 2860

Tisdale, Sask.
