RAC Canada Day Contest 2023 Results

RAC Contest Managers Bart Ritchie, VE5CPU and Sam Ferris, VE5SF

The RAC Contest Management Team is pleased to present the RAC Canada Day Contest 2023 Results in the following pages.

It was certainly nice to see the solar cycle continue on its upswing, leading to better conditions on 10 and 15 metres for the RAC Canada Day Contest 2023.

With improved solar conditions and a weekend Canada Day event there was a record 835 logs submitted – a 12% increase over last year's record performance.

With a total of 108,225 QSOs logged, it was not only the best entry turnout but the highest number of logged QSOs we have ever recorded!

Three new records were established this year with all of them in the new assisted categories. Please see inside for all of the details.

Thank you for participating in the contest!

We would also like to thank all of our great sponsors for continuing to support the contest and Amateur Radio in Canada and internationally. Their logos are provided on this page. Thank you!

RAC Canada Day Contest 2023 Results

Bart Ritchie, VE5CPU and Sam Ferris, VE5SF

The RAC Canada Day Contest is our way of celebrating Canada's Confederation on July 1, 1867 and it is always held on July 1. This year we were fortunate enough to have it fall on a weekend and we were hoping for a record turnout. We were not disappointed. There was a record 835 logs submitted – a 12% increase over last year's record performance. With a total of 108,225 QSOs logged, it was not only the best entry turnout but the highest number of logged QSOs we have ever recorded!

Radio propagation continues to improve in 2023, making it easier for those outside of North America to get some propagation into Canada. We saw a 21% increase from logs outside of North America as well as overall improved participation from Canada (up 15%) and the United States (up 5%). Single Op All Band CW and Single Op Low Power Assisted were the most popular categories with about 18% of the participants being from each of those categories.

In the second year of the new assisted categories, Igor Slakva, VE3ZF, set a new record with a score of 747,408 in the Single Operator Assisted High Power category, and Brian Campbell, VE3MGY, set a new record with a score of 350,244 in the Single Operator Assisted Low Power category. More records will likely occur in the future as participation increases. Victor Androsov, VA2WA, nudged up his prior record from 2019 in the Single Operator Assisted CW category with a new high score of 364,536 beating his old record by 432 points. With that introduction, on with the detailed results!

N7JI: 2023 Canada Day. O Canada!

N7WY: too much QRN to be effective – surprised to work UW1M on 40 metres!

N8PEP: 8S80AA is indeed the correct call sign. It is the special event call sign of Västerås Radioklubb.

VE5CPU: Thunderstorms and power outage ate into operating time, but fun day of QSOs.

VE5SF: Thunderstorms and logging software problems made for two hours lost on Friday evening. QRN was terrible on 40m during and following the storms. By the time the storms had passed many low band mults were gone.

VE7RAC: This was the Surrey Amateur Radio Club on behalf of Radio Amateurs of Canada.

VE7WNK: 20 and 40 were the workhorses. 15+10 poor. 80 unusable, high QRN.

W7VC: First licensed December 2020. My last Canada Day as a "rookie"!

W8AIT: Canada Day 2023.

W9RE: Thunderstorms limited operation especially on 80 and 160. Good show. Thanks!

W9TCV: Only a few contacts early in the evening. Sorry to have been pulled away by other things and looking forward to a better showing next time. Thanks to all who participated. – 73, W9TCV

WA7BNM: Corrected serials to reflect what was actually sent for N4AF and VA7DX.

WB4EHG: Very poor band conditions here in SFL (Florida). I wish there were more Canadian contests.

WB8WUA: I had fun but I scored a lower multiplier value this instance (no VE4s and no VE5s), as there was a low number of Canadian participants. Thanks for this good Canada Contest opportunity.

WO9B: Thank you for another splendid contest. There is just something zen about chasing VEs and their VA and VY siblings around the bands. Touché!

WQ6X: This was WQ6X's first RAC GiG run as a QRP station from Ramona, California. Except for putting in three OP-hours with HP-N7NR, this was an ad-hoc attemptto make a QRP operation as top-notch as can be had running QRP. I ran the K3/0 remote to Ramona, running 5-watts to a 3-el Stepp-IR for the high bands, a 2-el Shorty-40 and a coaxial dipole for 80-meters. Speaking of 80, 80/75 was the biggest disappointment for this GiG, followed by 10-metres. 20 metres was *the* band, although 15 metres had some possibilities. From my viewpoint, there was a dearth of SSB operation this year. Wassup with that? I managed to break a number of pileups, by using carefully-timed calls to the run stations allowing me to slip into the silence – enough to be heard. Look for a writeup.

WX4DAT: Had a great time with RAC Contest. Look forward until the next.

YB7XO: Great contest!
