Guthrie's Communication Inc

Guthries Communications Inc., formerly Guthries Mechanical Services, is a family-run business serving the Greater Toronto Area and Southern Ontario for over 50 years.

Company founder Don Guthrie, VE3EVZ, has over 50 years of experience in tower work which has been passed down throughout the family generations. It was Don's love of Amateur Radio that first brought him into the field of antenna and tower installations.

Now generations later we are still growing in the tower business. We work with Amateur Radio operators and their projects along with many commercial projects. We specialize in installing all types of towers including Trylon, Maxtower, Delhi, Rohn, AN Wireless, Turris Corp and other manufacturers from non-penetrating roof mounts to monopoles, cellphone communication hardware installs on building rooftops, guyed towers and self-supporting towers.

We're always happy to give advice and a more detailed description of our services and costs. Please call Don, VE3EVZ, or Todd, VA3TGT, at 905-251-7133 or email todd@guthries.com at any time.

Coax Publications Inc is Ending Operations

For over 16 years Coax Publications Inc has produced the best study materials for students studying for their Canadian Basic or Advanced Qualifications in Amateur Radio. After considerable thought we have decided to discontinue business at the end of 2025.

Our books will remain available through the online order entry system as long as stock remains. At this time it is expected that there are sufficient Basic Qualification Study Guides available for the Fall 2025 class season.

There are also sufficient Advanced Study Guides for well into the spring of 2026 when ISED is expected to release a new Question Bank. If you attempt an order and insufficient stock exists to fulfil it, the order will be rejected automatically.

The Basic Qualification Study Guide has been checked and we believe it covers all topics in the new ISED Question Bank which was released on July 15, 2025 – with some additional material that is shown on the Errata webpage. There are three downloadable replacement pages there in PDF format. All cross-references in the Student Success Pages have been updated. The Student Success Pages that are included with each study guide do not expire and they will remain online for the foreseeable future.

Please place your order as usual through the online order entry system at: <https://www.coaxpublications.ca/>

\$49.95 + shipping and taxes, includes unlimited access to the Student Success Pages on our website and also "Ask the Professor" assistance.

Note: This does not constitute permission for anyone to reprint or otherwise distribute our books! The material contained in them is under copyright until at least the end of this century and it will be our intention to enforce our Intellectual Property rights.
